COVID-19 UPDATE FOR MONTGOMERY COUNTY

MONTGOMERY COUNTY – Montgomery County Public Health District, in conjunction with Montgomery County Office of Emergency Management, can confirm Montgomery County now has 31 positive cases of COVID-19, an increase of 8 from yesterday (see more information below.) We would like to emphasize the importance of staying home if you are able and social distancing. The virus is now in all parts of our county. Regardless of exactly where these patients reside, it is spreading in the community. Increased hygiene practices, like frequent hand washing and surface disinfecting, are imperative.

As of 3:00 pm today, MCPHD has been notified of 241 negative and 31 positive test results of county residents. We have results pending for another 149 residents.

Here are updates on Montgomery County's current cases:

*map of areas is attached to this email

Case # 1 - A man in his 40s, who resides in Northwest Montgomery County, is still hospitalized. He remains in critical condition, but he is stable and continues improvement. As a result of our investigation, we do believe he contracted the virus as a result of community spread. (reported 03/10/2020)

Case # 2 - A woman, in her 40s, who resides in Southeast Montgomery County. She remains in a hospital in Harris County, in critical condition, but she is stable and is showing improvement. Her only travel was to New Orleans. (reported 3/12/2020)

Case # 3 - A man, in his 40s, who resides in Northwest Montgomery County. He has been re-admitted to the hospital. His only travel was to Florida. (reported 3/12/2020)

Case # 4 - A woman, in her 40s, who resides in Northwest Montgomery County. Fortunately, she has fully recovered. Her case is connected to Case # 3. (reported 3/14/2020)

Case # 5 – A man, in his 50s, who resides in Southwest Montgomery County. He is in isolation in his home. The man has recently traveled to California. (reported 3/17/2020)

Case # 6 - A man, in his 40s, who resides in Southwest Montgomery County. At this time, he is in isolation in his home. The man has recently traveled to California. (reported 3/18/2020)

Case # 7 – A woman, in her 60s, who resides in Northwest Montgomery County. At this time, she is in isolation in her home. She has no recent travel history, and no known contact with other patients. (reported 3/18/2020)

Case # 8 – A woman, in her 40s, who resides in Southeast Montgomery County. At the time, she is in isolation in her home. She has recently traveled to Germany. (reported 3/19/2020)

Case # 9 – A man, in his 50s, who resides in Southwest Montgomery County. He is currently hospitalized in critical but stable condition. No known travel. (reported 3/19/2020)

The current CDC recommendation is that the majority of people who contract this virus can successfully recover at home. If you start experiencing symptoms which include coughing, fever and shortness of breath, and they become severe – contact your healthcare provider. The CDC believes that symptoms of COVID-19 may appear in as few as 2 days or as long as 14 days after exposure.

Tips for the general public:

- ☑ Wash hands often for 20 seconds and encourage others to do the same.
- ☑ If no soap and water are available, use hand sanitizer with at least 60% alcohol.
- ☑ Cover coughs and sneezes with a tissue, then throw the tissue away.
- ☑ Avoid touching your eyes, nose, and mouth with unwashed hands.
- ☑ Disinfect surfaces, buttons, handles, knobs, and other places touched often.
- ☑ Avoid close contact with people who are sick.
